<u>Task</u>	<u>Marks</u>	<u>Comments</u>
Task 1	2/2	All requirements are fulfilled
Task 2	5/5	All requirements are fulfilled
Task 3	35/35	All requirements are fulfilled
Task 4	3/3	All requirements are fulfilled
Task 5	17/20	<p>Very creative way of search strategies. But correct me if I am wrong, you declared “levenshtein” key and associated value for each criteria (i.e: for \$location with 0), but why not using it?</p> <p>If, task 5’s code is optimized for more efficient, it would be perfect (-3 points)</p>
Task 6	5/5	All requirements are fulfilled
Task 7	5/10	While I grasped the essence of your work, I found the UI in Task 7 to be quite confusing, as it does not provide a user-friendly way to specify search criteria. (-5 points)
Task 8	10/10	All requirements are fulfilled
Overall Quality	7/10	Average UI. The solution is quite well commented and overall quality is good.
Total	89/100	What I like about your submission is that, you are making an innovation and creative search strategy.
